

## Australian Appaloosa Association Ltd.

### 26. APPROVED BREEDING REGISTRIES

A.J.C. Registered Thoroughbreds  
Australian Quarter Horse Association  
Australian Stock Horse Association  
Arabian Horse Society of Australia  
Australian Stud Book Thoroughbred  
Australian Warm blood Horse Association (AWHA)

***NB. Arab horses of UNKNOWN breeding (part bred) or Arab Riding ponies are disallowed. The onus is on the owner of a part bred Arab to be able to prove by means of copies of registration certificates that their horse is eligible to be used in the AAA breeding programme.***

#### **(a) HYPERKALAEMIC PERIODIC PARALYSIS DISEASE (HYPP)**

Progeny of an HYPP N/H parent(s) must be tested using the official procedure before they are considered for registration. Contact the AAA Ltd. Office for details. Horses tested HYPP H/H are not eligible for BREEDING registration.

---

### 27. ARTIFICIAL INSEMINATION

Artificial insemination may be used and resulting foals are eligible for registration with the AAA if the following conditions are met:

- (a) A properly completed breeding certificate shall be issued and filed with the AAA Ltd and a duplicate breeding certificate shall be issued to the mare owner.
  - (b) Semen is allowed to be stored, shipped or transported from the premises, where the stallion is standing to the mare.
  - (c) Mares being bred shall appear on the breeding certificate as being bred artificially and provide written verification from registered vet.
  - (d) The maximum number of straws of semen to be used after the death of a stallion shall be five hundred.
  - (e) Once a stallion has been gelded, no further frozen semen shall be used.
  - (f) Imported FROZEN semen can be used for artificial insemination provided the above rules are met. In addition, a letter of authority from the Stallion Owner must be provided, nominating name of agent authorised to sign service certificates to be forwarded to the AAA Ltd Office.
-

## **44. NON APPALOOSA STALLIONS IN BREEDING PROGRAMME - APPROVED BREEDING REGISTRIES**

If the stallion is not a registered Appaloosa then a photocopy of the stallion's current registration certificate issued by an approved breed registry must be submitted with the application for registration of resulting foal. A Certificate of Service must be lodged with the AAA Office with appropriate fee by 1st July in that breeding year. **(See also Rule 26).**

---

## **51. STALLION OWNERS**

Effective 1 August 1994, all AAA registered stallions 15 yrs and under intended for breeding must be blood typed. Service Certificate books are available to owners/lessee of a Registered Stallion from AAA Ltd. Office (See Schedule of Fees).

For all mares bred to stallions used in the AAA Ltd breeding programme, Certificate of Service, in triplicate, must be issued by the owner or lessee, showing the mare's breed name and number, colour and markings, owner and address, stallions name and number, and where located, dates of service and authorised signatures.

Stallion Classification - a penalty of up to \$1000 maximum fine as determined by the Board of Directors, for breeding with a Stallion prior to official classification as a Stallion.

All owners/lessee of registered stallions must forward to the AAA Ltd the Service Certificate original for all mares bred to the stallion during the year. Until such certificates are filed with the AAA Ltd, the resulting foals cannot be registered. A Statutory Declaration giving permission to an authorised agent to sign Service Certificates on behalf of the Owner/Lessee must be lodged with the Association's office by 1st July in that breeding year.

If a mare is exposed to two or more stallions in less than 45 days, a blood test will be required before the resulting foal can be registered, with the owners paying the cost of the blood testing. If the correct sire cannot be determined as a result of the blood testing, the name of each stallion must be given as the sire of any resulting foals and a stallion breeding certificate shall be supplied with respect to the services of each stallion. The charge for blood testing will be the actual and necessary cost for performing each test.

In any case of doubt regarding the true parentage or identification of any animal, blood tests may be required, and taking into consideration the results of such tests and/or such other information as may be available, the Secretary may authorise such corrections in the records as may be determined to be necessary or appropriate. In all proceedings concerned with or affecting registrations and records the burden of resolving any doubt as to the true parentage or identification of an animal shall be upon the applicant or owner.

The duplicate service certificate must accompany the resulting foal's application for registration, where it will be checked with the original. Only owners of a registered, classified stallion are eligible to use Service Certificates. **ONE BOOK PER STALLION.** (i.e. two or more stallions cannot use same Service Book).

**NO PERSON SHALL MAKE ANY ALTERATION OF INFORMATION ON A SERVICE CERTIFICATE.** A Service Certificate on which information has been changed will not be acceptable for the purpose of registering a horse with the Association.

No Service Certificate will be accepted for stallions unless they are classified and registered with the Australian Appaloosa Association Ltd and the owner or lessee is a financial member.

The stallion owner or lessee must send to the AAA office Service Certificates for all mares exposed to the stallion whether tested in foal or not. Late certificates after July incur an extra fee (See Schedule of Fees).

The stallion owner or lessee must state full date and year mares are bred. Paddock bred is not sufficient. When paddock bred must state date mare is placed in paddock and date she is taken out.

If certificates and fees are not in AAA Ltd office by 1 July each year and owners do not comply with AAA Ltd rules, their name may be listed in the AAA magazine and subject to suspension by AAA Ltd.

---

## **52. UPGRADE TO STALLION**

All colts Australian bred and imported must be veterinary inspected before upgrading to stallion. The basis of veterinary inspection is designed to determine the eligibility of a stallion as a registered sire for breeding.

Colts are eligible for inspection from August in the season in which they turn 2 years old.

Colts will be eligible for acceptance into the registry upon production of a certificate supplied by the Association and signed by a qualified veterinarian stating that the horse is:

- a) Not a cryptorchid
- b) Not a monorchid
- c) That both testicles are descended and evenly sized
- d) Not parrot mouthed
- e) Shows no visible signs of hereditary unsoundness
- f) At least fourteen hands high at the wither.
- g) All colts must be blood typed before upgrading to stallion papers. Blood typing fee to be paid to the office PRIOR to Veterinary inspection forms being sent to the owner.

The above certificate is to be accompanied by a coloured photograph of the horse signed by the veterinarian on the day of inspection verifying the identity of the horse.

The signed certificate and photograph should then be forwarded to the Association office together with the required fee, a further three (3) recent photographs (2 nearside, 1 offside) of the horse and the certificate of colt recording. A registration certificate will be issued when all is in order.
